

Our Interior Cedar Paneling is created using mill-direct Western Red Cedar and a proprietary non-toxic wood treatment process, resulting in a timeless finish.

Hewn's Interior Cedar Paneling is sealed using our high-performance Renner finishes, and is intended to maintain the original look and feel over time.

Cleaning

We recommend using only a light duster when cleaning these types of products, and to never use bristled brushes of any type, or liquids including water, or even delicate soaps.

Care & Maintenance

This is a pre-finished product, and should be handled with care during installation.

On an interior application where there is little-to-no direct UV exposure, very minimal maintenance is required to maintain the finish of this product. Interior applications subject to direct UV exposure may require minimal maintenance.

If the material is somehow damaged or showing signs of fading, please reach out to warranty@hewn.com.
