Product Specifications: Cypress CMG Box Beams

Hewn's Cypress CMG Box Beams highlight the warmth and natural variation of mixed-grain Cypress in a versatile beam format for ceilings, wrapped details, and architectural accents.

Cypress has a long reputation for durability and character. The mixed-grain presentation brings more movement and natural variation to the beam face, making it a strong fit for projects that want a warmer, more expressive timber look.

Often called the wood eternal, Cypress is valued for its durability, workability, and long architectural history. The mixed-grain cut introduces additional visual movement and natural variation across the beam face.

Lengths

Hewn Cypress CMG Box Beams are available in one-piece and jointed programs. Final length range, seam strategy, and dimensional envelope are coordinated to the selected species, finish, and project requirements.

End Caps

Optional end caps are available in both Standard Grain and End Grain treatments to suit exposed beam ends, wrapped conditions, and finished returns.

Standard Grain

End Grain

Straps & Joint Options

Lap Joint, Lock Joint, Butt Joint, and Assembled Scarf detailing can be coordinated as required by beam length, installation sequencing, and the desired seam strategy.
