Hewn's Abodo® Vulcan SVG (Semi Vertical Grain) wood redefines what's possible with sustainable timber, offering a striking blend of beauty, performance, and environmental responsibility. Engineered through advanced thermal modification, Abodo SVG is naturally durable and dimensionally stable, making it an exceptional choice for a wide range of architectural applications. Its warm tones and refined grain add an organic sophistication to any space, indoors or out.

At Hewn, we elevate Abodo SVG Wood through our meticulous finishing techniques and comprehensive in-house manufacturing processes, ensuring each piece meets the highest standards of quality and aesthetic appeal. Our skilled artisans apply proprietary finishes that enhance the natural beauty and durability of Abodo SVG Wood. These finishes are designed to protect the wood from environmental factors while highlighting its unique grain and texture, resulting in a product that is both resilient and visually stunning.

Custom Options

Hewn's Abodo Paneling and Siding can be customized to fit the individual needs and specifications of your particular project. Our finely skilled craftsmen can modify nearly any part of our in-house process to create a material designed according to your specifications, and our color technicians can match any shade or tone provided to us as part of our custom sampling process. Please contact a Hewn sales representative for more information.

Abodo wood is a sustainably sourced timber from New Zealand's Forest Stewardship Council® certified, rapidly renewable plantation forests. Through a precise thermal modification process, Abodo enhances the wood's durability and stability without the use of harmful chemicals, resulting in a product that is both beautiful and environmentally friendly. Designed to age gracefully, Abodo wood maintains its aesthetic appeal and structural integrity over time, making it an ideal choice for various applications, including cladding, decking, and interior paneling.
