

Hewn is one of the few American companies with a nationwide presence producing timeless solid White Oak flooring crafted with traditional methods. We start with 1" solid rustic white oak, and utilize the natural surface of the wood as our platform to create the timeless look and tone of an antique board. With the ability to mix board widths up to 9" (wider widths available based on market conditions) in a variety of lengths from 5' to 10', our hardwood flooring product can achieve any vision you have in mind.

This flooring material is sourced from the Northern Midwest region of the United States. These boards are cut, seasoned and dried before being shipped directly to our shop. All of our flooring is hand-tooled, and delivered with factory finished edges. Our products can be delivered within predictable deadlines, and are free of any dangerous contaminants that are often found in reclaimed wood

products or cheaper hardwood flooring from non-domestic sources. While we use many modern techniques to create our hardwood flooring products, each piece of wood is unique, and has its own distinct character that is often missing from mass-produced flooring.

Flooring Textures

Brushed

Wire-brushed texture with a consistent thickness and a flat surface.

Classic

Hit and miss texture, with variation between the original surface, and the smooth planed surface.

Hand Scraped Classic

Features timeless tool marks that create our most textured surface, with subtle height variations.

Smooth Circle Sawn

Our smooth Standard texture, with accompanying circle saw markings.

Classic Circle Sawn

Our hit and miss Classic texture, with accompanying circle saw markings.

Why Choose Solid Wood Flooring?

Hewn's Solid Wood Flooring is designed for multiple lifetimes of use. In a market flooded with cheap laminate substitutes, solid hardwood flooring is an investment into the future of your home or space. Our solid hardwood flooring is thick enough to be sanded and refinished numerous times over the course of its life. This material can also be purchased in wider widths, an option that is increasingly more difficult to find due to the time and skill involved in producing it at scale.

Flooring Trim Accessories

Our Flooring Trim Accessories allow you to complete the look of your floor, with matching or complementing colors. These accessory pieces are made alongside your flooring in our workshop, and can be customized to fit any needs or requirements.

Our Flooring Trim Accessories include, but are not limited to: Shoe Base Profile, Transition Strips, Flooring Reducer, 1/2" Quarter Round, 3/4" Quarter Round, 1" Quarter Round and Plinth Blocks.

Hand Scraped Charred

Custom Options

Our full-service design and production team is capable of providing a finished floor product with options in milling, texture, color, and finish on all wood flooring species and grades. These finishes range from rustic old-world characteristics to smooth and perfected fine finishes. We specialize in matching your needs using, photos, samples, and descriptions. Once a sample is matched and approved we are able to produce your order accordingly.

Thickness, width, and length limitations are determined by the raw material we source. This allows us to be flexible based on your design specifications.
