

Hewn's A and Better Clear Vertical Grain Cedar Siding and Paneling can be customized to fit the individual needs and specifications of your particular project. Our finely skilled craftsmen can modify nearly any part of our in-house process to create a material designed according to your specifications, and our color technicians can match any shade or tone provided to us as part of our custom sampling process.

A and Better Clear Vertical Grain Cedar, often simply referred to as CVG Cedar, is a highly prized and sought-after wood option known for its exceptional beauty and versatility.

What sets this option apart is its distinctive grain pattern, characterized by straight, closely spaced vertical lines that run primarily parallel to the length of the board. This unique grain pattern is a result of how the wood is sawn and cut, and can be showcased on both interior and exterior applications.

A and Better Clear Vertical Grain Cedar Collection

Hewn's A and Better Clear Vertical Grain Cedar Collection is designed to embody the perfect synergy of beauty and performance, showcasing the inherent elegance of nature's craftsmanship while providing enduring quality. All products can be customized, and are available in variations for both interior and exterior applications.

Custom Options

Hewn's A and Better Clear Vertical Grain Cedar can be customized to fit the individual needs and specifications of your particular project. Our finely skilled craftsmen can modify nearly any part of our in-house process to create a material designed according to your specifications, and our color technicians can match any shade or tone provided to us as part of our custom sampling process.

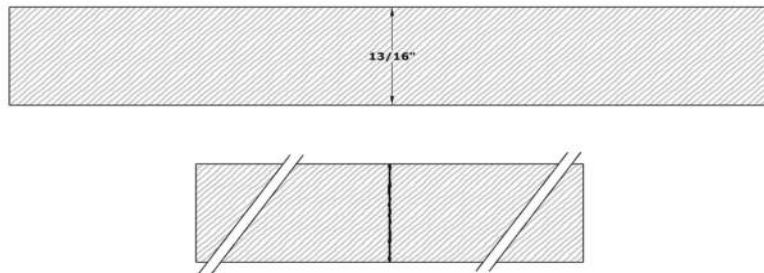

The Cedar Advantage

Beyond its aesthetic appeal, one of the most distinctive qualities of A and Better Clear Vertical Grain Cedar is its remarkable durability and natural material resistance to decay, insects, and moisture. This makes it a popular choice for both exterior and interior applications, where Cedar's rich history as a construction material gives credence to its continued use as a premier option.

Standard Milling Profiles

Hewn's A & Better Clear Vertical Grain Exterior Cedar Siding is available in a variety of milling profiles, designed to fit the individual needs of your project. Our most common milling profiles, listed on this page, assume our standard thickness of 11/16".

Our A & Better Clear Vertical Grain Exterior Cedar Siding is milled to your requested specifications in-house, allowing for the highest level of oversight throughout the entire production process.
