

Hewn's Interior Cedar Collection is created using our unique color process, and is equally durable for both residential and commercial applications. Our material is sold as solid boards with multiple milling and width options, and in a variety of catalog colors and texture options.

In addition to our standard options, Hewn's highly-skilled team of color and finish specialists are able to craft custom creative and multidimensional color finishes, which allow designers and architects to realize their unique project palettes. If you can dream it, Hewn can create it.

Heritage Collection

Hewn's Heritage Collection is designed to replicate the look and texture of traditional American barnwood, featuring colors and finishes that are appropriate for both rustic and modern applications. All of our Heritage offerings feature raised wood grain, highlighting the natural uniqueness of the sustainably-sourced material that we utilize in our

Ohana Collection

The Ohana Collection is inspired by the sights and color palettes of Hawaii. These colors are designed to be complementary to each other, and are ideal for use as an accent element, or as your primary color choice.

All of these colors feature raised wood grain, adding depth and texture that cannot be created with a standard paint application.

Shou Sugi Ban Collection

Shou Sugi Ban is a traditional Japanese technique of charring wood, usually cedar, to increase its durability and resistance to fire, insects, and rot. The process involves carefully burning the surface of the wood to create a unique blackened appearance that is both aesthetically striking and functional.

Trusted for Centuries

Cedar has a long history of being used as a building material for houses, ships, religious structures, and objects of importance, spanning from ancient times to the modern day. The Western Red Cedar that Hewn exclusively uses is sourced from regions in and around the Pacific Northwest, where cedar has long been trusted for its stability against the elements, and its protection against mold and mildew. This proven track-record, combined with Hewn's unique and proprietary finishes, results in a product that is unmatched and highly sought-after in the industry.

Specifications

Custom Options

Hewn's Interior Cedar Paneling can be customized to fit the individual needs and specifications of your particular project. Our finely skilled craftsmen can modify nearly any part of our in-house process to create a material designed according to your specifications, and our color technicians can match any shade or tone provided to us as part of our custom sampling process.

The Cedar Advantage

Hewn sources all of our Cedar from North American sources, with a focus on sustainability and consistent quality. When properly installed and cared for, Hewn's Exterior Cedar Siding is designed to last long into the future. Whether you are looking to add a splash of wood to a modern look, or give a space a complete rustic renovation, Hewn's Interior Cedar Paneling is a prime choice for an interior design option.

Standard Milling Profiles

Hewn's Interior Cedar Paneling is available in a variety of milling profiles, designed to fit the individual needs of your project. Our most common milling profiles, listed on this page, assume our standard thickness of 13/16".

Our Interior Cedar Paneling is milled to your requested specifications in-house, allowing for the highest level of oversight throughout the entire production process.

Standard Milling Profile Widths

Square Edge

1×4 (3½" face)
1×6 (5½" face)
1×8 (7¼" face)
1×10 (9¼" face)
1×12 (11¼" face)

Tongue & Groove

1×4 (3⅞" face)
1×6 (5" face)
1×8 (6 ⅝" face)
1×10 (8 ⅝" face)
1×12 (10 ⅝" face)

Shiplap

1×4 (2¾" face)
1×6 (4¾" face)
1×8 (6½" face)
1×10 (8½" face)
1×12 (10½" face)

T&G Milling Profiles

Hewn's Interior Cedar Paneling is sold in widths of 1×4, 1×6, 1×8, 1×10, and 1×12. All T&G widths come standard with a ¼" tongue. T&G 1×8, 1×10, and 1×12 T&G profiles can be milled with either a ¼" tongue, or a ⅜" tongue. Profiles for our most common widths (1×6 and 1×8) are shown below. For more profiles, please refer to our Specification Sheet.

Hewn has the capability to create custom milling knives in-house. For more information on custom milling options, please contact one of our sales representatives.
