

The Ultimate Protection UV+ Systems are Smart Solutions to Improve Wood Longevity

The water-based Ultimate Protection UV+ range is created to ward off the attacks from the most aggressive atmospheric and biological agents, thus revolutionizing the concepts of care and maintenance.

Thanks also to its Self-Consuming formula, maintenance and restoration, which are normally complex and demanding procedures, finally become quick operations, as sanding is no more necessary.

Main advantages of Ultimate Protection UV+ Solutions

- They are self-consuming and do not peel off
- They don't need sanding
- They resist to solar radiation
- They impede fungi, molds and bacteria from proliferating
- They shield from water
- They defend against salty sea mist
- They protect from abrasions and foot traffic
- They nourish the wood, enhancing its original features

Reactive stains vs. a product like Renner. When maintained it will stay the original color.

While maybe not as well known in the architectural paint & house coatings market, Renner is a global leader in industrial wood finishes. The Hydro Oil line of products are a waterbased formulation allowing exceptional application schedules while being environmentally-friendly and combines a best-of-all approach with acrylic performance in a non-film forming oil-like result. This allows for a sacrificial or self-consuming result not apt to peeling or cracking with an ease in maintenance- simply clean and re-apply, no sanding/removal required. The range of stains and finishes allow for full flexibility in aesthetic result with control of tone, opacity, and sheen.
